Can Be Used in Enclosed Spaces
Where Emissions are a Concern

- Adjustable “T BAR” handle provides maximum control
- Effectively drives up to a 12 foot equilateral screed bar
- Ideal for areas where gas emissions would be a concern such as mining applications, underground or enclosed sites
- Consolidates the concrete as it screeds
- Dayton 2M145 Motor
- Heavy duty bearings and drive shaft
- Bearings, shaft and eccentric weight sealed in synthetic oil bath
- Easy screed bar disconnect for changes and transport
- Bicycle style handle available
