Ask About Used NLB Equipment For Sale

RENTAL OVERVIEW

High-pressure water jetting systems from NLB can solve the toughest product removal problems. For more than 40 years, we've been harnessing the power of water to provide an efficient, cost-effective cleaning tool for industrial plants and contractors. Whatever the build-up — rust and scale, resins, chemical residues, paint, epoxies — an NLB water jet system cuts right through it and rinses it away. Water jetting leaves a clean, smooth surface, and is faster than manual methods. You won't need chemicals, solvents or caustics (or the expensive safety and disposal procedures that go with them). Bottom line: water jetting is an, efficient, non-polluting way to higher productivity... and greater profits.

WHY RENT?

It is a simple matter of economics that some jobs just cannot justify the purchase of a water jet pump and related accessories. But that doesn't mean you must miss out on the job. Renting is a cost-effective alternative to purchasing. Renting avoids a capital expenditure and allows contractors or industrial companies the full use of equipment at a fraction of the purchase price. Renting for a short time, or for a specific job, also allows you greater flexibility with operating and maintenance budgets.

WHY RENT FROM NLB?

NLB specializes in high-pressure and ultra-high pressure water jet technology (pressures up to 40,000 psi). We are a leading innovator in the design and application of water jetting equipment, with quality and reliability that ensure maximum up-time.

NLB maintains rental fleets in Michigan, New Jersey, Louisiana, Texas, California, Washington, and Indiana. In addition, NLB rental units and accessories, parts and service are also available at all Vac2Go vacuum truck rental company locations, providing even more rental options closer to where you need them.

Each regional location is staffed with factory-trained technicians to help you choose the right pump and accessories for your job, and assist you with arrangements. Our service technicians are also available for on-site training, start-up and maintenance.

WHAT DOES RENTING INCLUDE?

NLB rents both trailer-mounted diesel units and skid-mounted electric units, so you can choose the style that best suits your job. You can also rent accessories, such as rotating Spin-Jet® units, 3-D tank cleaning heads, and our exclusive HydroPrep™ surface preparation system. Daily, weekly and monthly rentals available.

STANDARD RENTAL PACKAGES:

- ✓ Pump Unit
- ✓ 100 ft. of High-Pressure Discharge Hose
- ✓ 100 ft. of Intake Hose
- ✓ Hand Lance or Foot Control Valve
- ✓ Spare Parts Kit
- ✓ Consultation
- ✓ Operation, Maintenance and Safety Training

We provide free in-house training for all rental customers, covering the operational capabilities of various pumps and accessories, maintenance procedures and safety aspects. Whenever an operator successfully completes a course, their training is recorded on a handy, wallet-sized card that they can carry on the job.

TERMS AND CONDITIONS

1. Renter must provide a certificate of insurance for this equipment. LESSEE shall furnish and pay for (1) Automobile liability with personal injury and property damage coverage in the amount of at least \$500,000, (2) General liability with personal injury and property damage coverage, including coverage for premises liability, products and completed operation liability, and contractual liability in the amount of at least \$1,000,000, (3) Statutory worker's compensation and (4) Property insurance.
2. Renter understands that all individuals operating NLB Equipment must be fully trained. NLB offers training for anyone needing it.
3. Renter understands they will be invoiced for all parts not returned and / or used during equipment rental period.
4. Renter understands that routine maintenance is the responsibility of the Renter/Lessee.
5. Renter must provide, when applicable, a towing vehicle capable of handling the required weight of the rented equipment.

NOTE: Full terms and conditions are available on the NLB Rental Agreement as the above information is only a partial synopsis.

CONVERSION KITS

NLB'S QUICK CHANGE FLUID ENDS.

The quick conversion fluid end allows the pump the capability to operate at pressures between 8,000 psi (552 bar) and 40,000 psi (2,760 bar) and makes maintenance fast and easy.

Conversion takes only about 20 minutes (30 minutes for 40,000 psi) using NLB's Quick Change Conversion Kit (can be rented when needed for an existing NLB pump).

UPS Shippable up to 325 Series.

*U.S. Patent 8,221,100 and 7,121,812.

HOSE + HOSE ACCESSORIES

COLOR	PSI	BAR
● YELLOW	10.000	690
● GREEN	15.000	1,034
● BLUE	20.000	1,379
● ORANGE	40.000	2,758

High-pressure hoses are designed for use with various operating pressure ranges. If used/matched incorrectly with the designated pressure, they could present a safety hazard. To better identify the pressure in use, WJTA has provided that this color scheme is used for the applicable maximum working pressure of each hose. The color should be easily identifiable at least 2 ft. from both hose ends of each hose length.

NOTES

NLB'S RENTAL/ PURCHASE PLAN

If you're considering the purchase of NLB equipment, our rental program has a purchase option that gives you the opportunity to "try before you buy." Rental/Purchase lets you apply a percentage of the rental amount already paid to the purchase price — in some cases, the entire amount.
