QUALITY WATER JETTING TOOLS
FOR **INDUSTRIAL CLEANING.**

BUILT DIFFERENT.

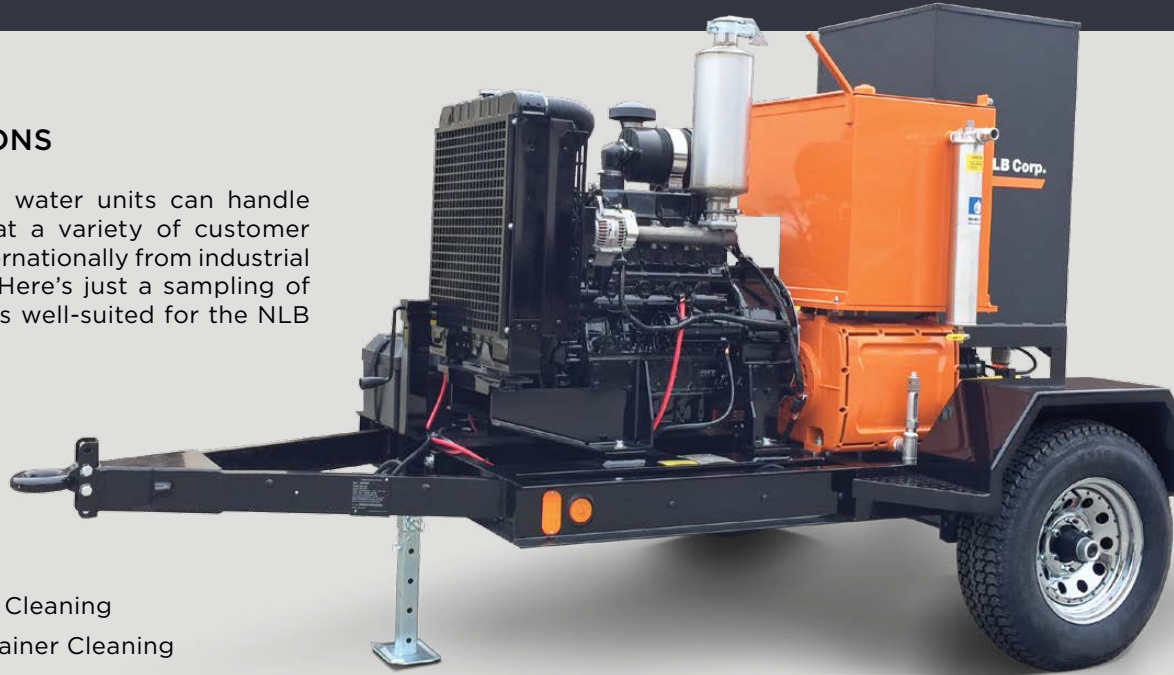

Low pressure, hot water units are known for being finicky, undependable and not unfamiliar to frequent shop repair and customer dissatisfaction. Until now. NLB 335 DHW and 535 DHW Hot Water Jetting Units are ideal for the daily demands of industrial facilities, contractors and equipment rental operations but easy on your bottom line. If you're thinking plastic and thin gauge metal, you won't find it here. NLB products are built with real iron, steel and U.S.A. built components that stand up to the rigors of high volume, long hour operation.

QUALITY RUNS DEEP TO KEEP YOU RUNNING LONGER.

UNLIMITED APPLICATIONS

If you can think it, NLB hot water units can handle it. Our units can be found at a variety of customer facilities domestically and internationally from industrial contractors to theme parks. Here's just a sampling of the cleaning application areas well-suited for the NLB hot water unit:

- Gum Removal
- Mold/Mildew Removal
- Iron Staining Removal
- Pool Refurbishment
- Parking Lot Surface Prep
- Constructiton Equipment Cleaning
- Waste Management Container Cleaning
- Industrial Environment Grease Removal

- **Easy Access Fuel Tank**
60-gallon capacity fuel tank allows 12+ hours of constant operation and fewer refills
- **Long Lasting Engine**
66 HP Kubota engine utilizes only about 33 HP of output but offers plenty of additional power resulting in long lasting engine life
- **Powerful Triplex Pump**
Capable of 3,500 psi at 15 gpm (535 DHW: 4,950 psi w/ 9 gpm)
- **Powerful BTU Burner**
700,000 BTU Epps burner provides plenty of hot water and fast regeneration
- **Simple Controls**
Simple, easy-to-operate controls allow for a wide range of user experience
- **Eliminate Overheating**
Integrated low water shut off switch prohibits overheating and costly repair
- **Reduce Filter Costs**
Easy-to-access rinsable water filter eliminates disposable filters and reduces maintenance costs
- **Improved Safety**
Hot water flow switch that prohibits overheating of the water and improves the operator safety
- **Direct Coupled Design**
Eliminates PTO/greasing application
- **Trailer or Skid**
5,000 lb. capacity, single axle DOT-standards trailer or skid mount option for pickup truck bed transportation
- **Simple Design**
Makes it easy to service
- **Hitch Options**
Pintle or ball hitch options

Are your needs Electric?

Many of NLB's customers utilize the versatility and mobility of our diesel powered units but you don't have to be a road warrior to realize the benefits of the 335 and 535 units. We also offer our pressure washers in an eclectic format for in-plant environments. Find out more about NLB's electric-powered units by asking a NLB sales representative today!

MORE VERSATILITY.
MORE APPLICATIONS.

NLB offers the tools and accessories that turn a unit into a multi-dimensional powerhouse to tackle a variety of surface cleaning applications. Whether you're a contractor looking to expand your cleaning capabilities or in charge of a Fortune 100 facility, NLB's array of pressure washer tools and accessories can add greater flexibility & versatility to your pressure washer unit.

POWERFUL TOOLS FOR THE TOUGH JOBS.

NSG-870 DRY SHUT-OFF HAND LANCE

Hand lance operation can be tiresome and lead to operator fatigue no matter what the pressure. NLB's NSG-870 hand lance offers ergonomic design features and a light weight frame to keep water blasting for hours. A unique poly stock design sheds much of the butt-stock weight that promotes fatigue and trigger control design and placement make for easy operation. Interchangeable wand barrels makes going from soap application to rinse fast and efficient.

RMAX750 ROTATING NOZZLE

The RMAX750 nozzle makes quick work of surface stains, grime and dirt. The orbiting head concentrates a powerful stream of water with the nozzle action offers more surface cleaning coverage. The RMAX750 nozzle has earned a reputation for durable, trouble-free operation and lasting much longer than competitive nozzles.

5,000 PSI 3-D WATER JETTING HEAD

The NLB 3-D head is perfect for the cleaning of totes, small vessels and tanks. Made of all stainless steel construction, it's a durable, maintenance-free unit providing effective cleaning with 3-D action. The NLB 3-D head offers up to 5,000 psi of cleaning power with a maximum flow rate of 15 gpm that offers the power and coverage area to clean fast and efficiently. The head is self-lubricating and features a carbine sealing system. Rated for hot water jetting applications up to 250 degrees.

515-4S-30-5K-30 FLOOR CLEANER

Perfect for large surface cleaning jobs like sidewalks, parking lots, patios and shop floors. The 30" diameter cleaning area makes fast work of virtually any project. Made of high-quality stainless steel and at just 35 lbs, easy to handle. The NLB proprietary nozzle bar design features adjustable nozzles for consistent coverage area. The stainless steel castors guarantee an effortless cleaning experience even for extended use.

INJ3.5-15 CHEMICAL INJECTION DISPENSER

When the project calls for a bit more cleaning power, the chemical injection dispensing accessory delivers your suitable cleaning agent, soap or degreaser. The dispenser connects easily right to the pump unit's output valve with a quick connector system freeing up the operator from additional application actions at the lance.

The new NLB 335 and 535 Pressure washer units stand above the rest in durability and reliability and deliver up to 4,950 psi and flows of 16 GPM. Built to NLB standards, these are built for the long haul and can provide years of unflinching performance when others are long gone.
